Graduate Student Opportunities in Earth, Ocean, and Atmospheric Sciences

Rutgers University has formed a new Institute of Earth, Ocean, and Atmospheric Sciences with opportunities for graduate study towards the M.S. and Ph.D. degrees. Integrated study of the atmosphere, oceans, solid earth, and biosphere at Rutgers offers such diverse, interdisciplinary research topics as global climate change, paleoceanography, environmental biophysics and molecular ecology, geochemistry, ocean modeling, and transport of atmospheric pollutants. Graduate funding opportunities in the form of fellowships and research and teaching assistantships are available. Students may apply through our programs in Oceanography, Atmospheric Science, Geological Sciences, Ecology and Evolution, and Geography depending on undergraduate background and intended major area of interest. For further information and application procedures for the integrated programs in Earth, Ocean, and Atmospheric Sciences, please visit our website at http://eoas.rutgers.edu.

Rutgers is an Equal Opportunity/Affirmative Action Employer.
